How to read this

- **State source** We read the state's own rule or an official public-agency page.
 - **State source (indirect)** We found the state's official page but could only read it through a search summary — likely right, not yet confirmed.
 - **Two roundups agree** Two commercial adoption lists agreed when we checked; not yet confirmed against the state's own rule. The link goes to the list the date came from.
 - **Unresolved** We could not pin it down. We never guess — ask your AHJ.
- Local adoption** No single statewide edition. Cities or counties choose, so ask the local inspector.

States amend the NEC, and cities and counties can adopt differently. Your AHJ (authority having jurisdiction) has the final say. Not legal advice.
